

Stay Balanced with ChemLink Technology

Automatically maintain and monitor pH balance and sanitization levels in your residential swimming pool and spa with Jandy's new AquaLink[®] RS ChemLink[™].

Designed for convenience, ChemLink monitors sanitizer and pH levels automatically, activating purification systems if water chemistry falls below preset levels. ChemLink provides precision chemical dosing, alleviating the highs and lows caused by organic contaminants and overfeeding. Save time and money, and protect your equipment investment with ChemLink.

Automation Made Simple!

COMPLETE CHEMISTRY

ChemLink[™] activates most chemical feeders available on the market today. Control granular feeders, liquid feed pumps, ozone generators and salt chlorine generators safely and automatically.

MEASURE, MONITOR AND MAINTAIN

Keep your water clean, clear and pure without a fuss. No more handling messy chemicals or test kits. Because ChemLink samples and balances water continuously, your water is always ready when you are.

AQUALINK[®] RS INTEGRATION

Check water balance status, change current settings or start manual feed cycles from the convenience of any AquaLink[®] RS OneTouch or PDA control system.

COMMERCIAL QUALITY

ChemLink's water balancing technology has successfully withstood the test of harsh commercial pool environments for years. Now streamlined for residential applications, you can count on ChemLink to extend the life of your pool and spa.

Maintain Perfect Balance – Automatically

ChemLink™ ORP and pH water chemistry controller is designed for easy installation and operation from any AquaLink® RS OneTouch or PDA system. Adjust chlorination and pH levels automatically in response to bather load, temperature, organic contamination, and a variety of changing water conditions.

ChemLink Controller

Flow Cell

3-M AUTOMATION

- 3-M technology measures, monitors and maintains safe, balanced water
- Control salt water chlorinators, granular feeders, liquid feed pumps and ozone generators
- Constant monitoring avoids chemical highs and lows
- Saves wear and tear on salt chlorine generator cells by engaging cell only when chlorine is needed

MORE FEATURES, MORE OPTIONS

- Multiple feed time and feed delay options
- Auto alerts and safety shutdowns protect expensive equipment
- An additional ChemLink can be added for one additional body of water
- Optional Peristaltic pump for dosing
- Seamless interface with AquaLink RS provides total control from inside the home or poolside

Specifications

ChemLink™ C1900

Controller

ph Range:	7.0 to 8.0
ORP Range:	200 to 900
Input:	120 VAC, 50/60 Hz, 8 AMP Fuse 240 VAC, 50/60 Hz, 4 AMP Fuse
Output:	120 VAC @ 6.4 AMPS Maximum 240 VAC @ 3.2 AMPS Maximum
Display:	AquaLink RS OneTouch or PDA
Oper. Temp:	40 – 120° F

WARRANTY

ChemLink is backed by Jandy's highly trained service and technical support team and carries a one (1) year warranty.
